Q2

Seeking exemption for 14 CFR § 11.81

Q3

I am requesting relief to fly multirotors/rc aircraft for photography purposes. I would charge clients for this service. Possible search and rescue aiding could be conducted as well.

Q4

My request would benefit the public in several ways:

- Agriculture/farmers could use aerial photography as a very useful crop tool.
- Real-estate clients would have a better presentation tool for property.
- Search & Rescue, the benefits are endless.
- Business owners have multiple aspects in where they can benefit from this service.

Q5

This exemption would provide a level of safety by showing how an experienced individual can operate these systems for commercial use. This is a new industry being introduced to the public for the first time. It will take experienced and responsible people to cast this great technology in a positive light. With this exemption I feel I can play a positive role in this future technology.

Q6Rule

Exemption: To be able to use small unmanned fixed/rotary wing aircraft for commercial business.

Q7

Additional Information:

Background: I have been involved and piloting rc aircraft for the past 20yrs. I have been a member of the Academy of Model Aeronautics as well. I currently hold a AMA Turbine Wavier. I have safely operated these systems and would like to promote this new technology in a positive and safe manner.

Thank you for your time,

Michael Wilhelm
